

# Tiered Instruction and Assessment Grade 8

**2.8.11N**  
**2.5.11B**

Solve linear, quadratic and exponential equations both symbolically and graphically.

- Solve linear equations and inequalities symbolically.

## **Level III**

a. Solve this equation and show all the steps.

$$10 - (4 + 2x) = 12 - 2(2x + 3)$$

b. Justify that your solution is correct.
